BIBTAG USB READER

Check the athlete data

MYLAPS
SPORTS TIMING

The MYLAPS USB Reader is the perfect device for scanning BibTags. The reader can be used to randomly check if the athlete data is entered correctly, to check whether an athlete registered for the right race or picks up the right size T-shirt after the race.

The USB Reader can be used at expo's, running events and other sports venues, and shows the information about the athlete who is registered to the tag.
Its plug-and-play usability and travel-format makes the reader ideal for travelling to each occasion where you want to present your event.
With the reader's USB connection it can be attached to a computer, it enables you to quickly set it up and show the selected information on the screen.

- Plug and play
- Travel size
- Comes in a secure travel case
