

FLEX PRODUCTS POLICY

Most MYLAPS Transponders and Chips come with a subscription for 1, 2 or 5 years. When the subscription ends, you can renew it with another period: choose the subscription that fits your needs. If you choose **not** to renew your subscription, the transponder will cease to operate.

After purchasing your transponder or following subscription, you need to activate it by using MYLAPS Connect software, MYLAPS FLEX Manager software or the MYLAPS Speedhive App.

To download this, go to <http://www.mylaps.com/en/software-firmware> and follow the instructions on the website.

Need help with your device or with the registration of your transponder/chip? Please check www.mylaps.com
